

## **Cre8 Associates Limited 10th Anniversary Year**

### **Newsletter March 2014**

#### **European Distributor for American Power Systems Inc.**

**Cre8 Associates limited are pleased to announce they have been appointed the European distributor for American Power Systems Inc.**

APS technology leads the way in high power density three phase alternator development. They provide superior performance, custom designed, heavy duty, high output, high efficiency power systems solutions including high idle control systems, alternators and converters. Visit them at [www.americanpowerinc.com](http://www.americanpowerinc.com) or contact us for further information on their products and services we provide on their behalf.

Our **Field Service Team** completed a successful 2 week deployment in Afghanistan this month. We fitted Cre8 Electrical Systems and upgraded alternators. This has provided enhanced performance and aids battery longevity.

The systems of choice are supplied by American Power Systems Inc. They continue to provide a reliable and hard wearing solution for customer needs.

The **Field Service Team** are available for deployment in most areas of the world 24/7 365 days a year. As well as fitting our own systems, The Team are highly skilled in the fitment of RF communications, ECM and vehicle electrical maintenance.

## DC Generic Filters - Available April 2014

For many years Cre8 Associates have designed and built bespoke filters for customers. From April 2014 we will have a range of generic DC filters available. These can also be tailored to customer needs. Utilising a standard bolt on enclosure, these 2-6 way feed through DC filters can have Capacitive and Inductive filtering along with transient suppression depending on your requirements. Contact [enquiries@cre8-associates.com](mailto:enquiries@cre8-associates.com) for further information on this range
